C Program to print details of employees using structures.

Algorithm:-

① Start
② n=5
③ Enter employee details
   for (i=0; i<n; i++)
   input name[i], id[i], salary[i]
④ Display all details
   for (i=0; i<n; i++)
   output name[i], id[i], salary[i]
⑤ Stop

Flowchart:-

```
                          ( Start )
                             |
                             v
                          [ n=5 ]
                             |
                             v
                  / Enter employee details /
                             |
                             v
    False      /  for(i=0; i<n; i++)  \
  <----------- \                      /
                       | True
                       v
          / input name[i], id[i], salary[i] /
                       |
                       v
          / Display all employee details /
                       |
                       v
    False      /  for(i=0; i<n; i++)  \
  <----------- \                      /
                       | True
                       v
          / output name[i], id[i], salary[i] /
                       |
                       v
                    ( Stop )
```
